Project 1:

Project Name: Fusion Kitchen – ([Demo](#))

Responsibilities: Front-End Development

Technology: React JS, React Bootstrap , Material UI, Context API, HTML5, SASS.

Description:

- This app enables users to easily order food by searching for nearby restaurants using their postal code. You can choose between options for either picking up your order or having it delivered to your location.
- The listing page is equipped with a variety of filtering options and provides comprehensive restaurant details.
- A menu page assists users in selecting items according to their categories, and menu item's included availability, top recommendations, and customer favorites. It also supports a feature for displaying additional item options through a pop-up, and seamlessly integrates with an API for menu data retrieval and updates.
- Then users proceed with checkout payment process.
- User can track order and they can maintain their account (My Account).
- This website has the feature for a **Dark and Light** theme for all pages.

Responsibility: The project involves gathering requirements, developing a user interface, and integrating with APIs using the GET method for static pages.

Project 2:

Project Name: Fusion Innovative – ([Demo](#))

Responsibilities: Front End Development

Technology: React JS, React Bootstrap, Material UI, HTML5, SASS.

Description:

- This application provides insights into the organization's history, career opportunities, and partner affiliations, offering a comprehensive view of its journey.
- The application offers users the ability to submit inquiries and career applications through integrated API functionality.
- The application features a tailored employee review section designed to meet specific organizational needs.

Responsibility: The project involves gathering requirements and developing a user interface.

Project 3:

Project Name: Fusion My Business - ([Demo](#))

Responsibilities: Front-End Development & API Integration

Technology: React JS, React Bootstrap, Material UI, HTML5, SASS.

Description:

- The homepage of FMB (Fusion My Business) highlights product descriptions and key application features and benefits.
- This page incorporates an inquiry form with seamless API integration for submitting inquiries and receiving responses.

Responsibility: I have updating and creating new website pages AND integrates with POST method API Integration, and optimizing on-page SEO for enhanced web functionality and search engine visibility.
